PROFILE

Passionate full-stack developer with a strong foundation in web technologies, backend systems, and modern frameworks. Skilled in building scalable applications with clean, efficient code, I thrive on solving complex problems and optimizing performance. With experience in both frontend and backend development

EXPERIENCES

juin 2024 internship at ide-net

- interned as a full-stack developer in a French vehicle tracking app startup, contributing to both frontend and backend development. Developed real-time tracking features, implemented notification systems, and optimized data handling for better efficiency

may 2024 fornt end web developer for international marketing agency

- Developed and maintained responsive websites using React and WordPress, ensuring high performance and SEO optimization. Collaborated with designers and marketers to create visually appealing and user-friendly interfaces.

avril 2023 Call Center Agent for french costumers

- Handled inbound and outbound calls, assisting customers with inquiries, troubleshooting issues, and providing solutions. Maintained professionalism and efficiency to ensure a positive customer experience.
